John Smith
john.smith@email.com | github.com/johnsmith | linkedin.com/in/johnsmith | +1-555-0100

SUMMARY
Machine Learning Engineer with 4 years of experience building NLP and ML systems at scale. Specialized i

SKILLS
Python, SQL, scikit-learn, XGBoost, TensorFlow, PyTorch, pandas, NumPy, NLTK, spaCy
Docker, Kubernetes, AWS (EC2, S3, SageMaker), Git, Jenkins, MLflow
TF-IDF, Word Embeddings, BERT, Text Classification, NLP Pipelines

EXPERIENCE
Senior ML Engineer | TechCorp Inc | 2022–Present
- Built NLP classification system using TF-IDF and XGBoost, achieving 94% accuracy on 50K+ support ticke
- Reduced model inference latency by 40% through feature engineering optimization
- Deployed 3 ML models to production using Docker containers on AWS EC2
- Implemented CI/CD pipelines with Jenkins and automated model testing

ML Engineer | DataSolutions Ltd | 2020–2022
- Developed customer churn prediction model (Logistic Regression + Random Forest) used by 5 product tea
- Built text preprocessing pipeline processing 1M+ documents per day
- Collaborated with data engineers on Apache Spark ETL pipelines

EDUCATION
B.Tech in Computer Science — State University | 2020
GPA: 8.4 / 10

PROJECTS
- NLP Text Classifier: TF-IDF + ensemble learning (XGBoost, LR, NB) for multi-class text classification
- Resume Analyzer: SBERT + skill extraction system for job matching
- Sentiment Analysis API: FastAPI + BERT-based sentiment classifier serving 500+ requests/day

CERTIFICATIONS
- AWS Certified Machine Learning Specialty (2023)
- Deep Learning Specialization — Coursera (2021)
